- **Concepts & Methodologies:** Digital Fluency , Data Warehousing , Report Generation , Workflow Analysis , Continuous Risk Assessment , Critical Thinking

## Work Experience

*October 2025 – Current*

**FrontEnd Developer** - DonPeli Full Stack Consultancy, Lagos Nigeria

### Projects

- **Zulibabs Homes: A Web App for a Real Estate company**
  - Architected and developed a responsive, client-side Real Estate Web Application using React, leveraging TypeScript for code robustness and scalability. Implemented powerful, multi-criteria filtering and search functionality to significantly streamline property discovery and improve the initial user journey.
  - Frontend Stack: React, TypeScript, Redux (for centralized state management), Tailwind CSS.
  - Streamlined the property search workflow, leading to an estimated 25% decrease in time required for a user to find a relevant listing.
  - Compressed static assets and minimized the main JavaScript bundle size by 30% using Webpack/Vite configuration.
  - Overcame the technical challenge of managing concurrent, asynchronous data fetching required for both the property list and the map view components.
- **E-commerce Web Application/Web App (Self-Directed/Training Project)**
  - Technologies Used: HTML, CSS, JavaScript, React.
  - Architected and developed the Front-End of a functional e-commerce platform prototype, implementing key features like user authentication, product listings, and cart management.
  - Engineered a modern, responsive UI using React components, CSS/SCSS, and JavaScript to deliver a seamless experience across all desktop and mobile devices.
  - Accelerated application performance by 8% by optimizing React state management and application logic for interactive components

*June 2024 - Current*

**Data Analyst** - Gloworld Headquarter Adeola odekun, V.I, Lagos Nigeria

- Spearheaded customer behavioral analysis using SQL and visualized findings via Power BI dashboards, resulting in a 12% increase in customer satisfaction and more effective marketing strategies
- Enhanced a CRM system by implementing automated reporting features, directly saving the sales team and stock controllers 14 hours per week (6 hours and 8 hours respectively)

- Led a data integration initiative, significantly reducing data retrieval time by 40% and improving accuracy by 90%, demonstrating strong workflow optimization and technical management skills
- Standardized data entry protocols and implemented data validation checks, leading to a 25% reduction in data errors and improved data accuracy for key reports
- Improved reporting efficiency by 6% by streamlining data flow and consolidating over ten data sources (extraction, manipulation, wrangling, and cleaning) for reliable analysis
