I completed my secondary education in 2018 and have since been developing my skills and gaining experience in the field of Data analysis with a degree in computer science. Recently graduated in 2025 with a strong knowledge in software development, Data analysis, and problem-solving. I have hands-on experience with modern programming tools and technologies, and I am eager to apply my skills to real-world projects. I am passionate about learning, adaptable to new environments, and committed to delivering results that add value to the organisation.
